Solution

Exemplary for Germany

Paul Lloyd / CC0

1st field	2nd field	3rd field	4th field	5th field	6th field	7th field	8th field
15.3.20	18.3.20	21.3.20	24.3.20	27.3.20	30.3.20	2.4.20	5.4.20
5	10	20	40	80	160	320	640

So yesterday 640,000 people were demonstrably infected.

Consequently, $640,000 : 20 = 32,000$ would be seriously ill simultaneously.

1st field	2nd field	3rd field	4th field	5th field	6th field	7th field	8th field
15.3.20	18.3.20	21.3.20	24.3.20	27.3.20	30.3.20	2.4.20	5.4.20
5	10	20	40	80	160	320	640
	growth 15.-18.3. $10-5 = 5$	growth 18.-21.3. $20-10=10$
